

Organic deodorised rapeseed oil

The rapeseed is harvested and threshed. The rapeseed obtained is then dried. Subsequently, the seeds are coarsely crushed and passed through a smooth roller mill. This opens the cells of the rapeseed and flakes out. The oil is then obtained from these very fine flakes by mechanical pressing. During deodorisation, unwanted odour and flavour substances are separated. Rapeseed oil is rich in unsaturated fatty acids and also has a particularly favourable ratio of Omega-3 to Omega-6 fatty acids. It is excellent for cooking and baking.
