

Organic black chia seeds

Chia is an annual, herbaceous summer plant from the mint family with the botanical name *Salvia hispanica* L. Originally from Mexico, it is now grown in many countries in Latin America and África. The small chia seeds are black to grey and have an extraordinarily high swelling capacity. This superfood is a good source of protein and has a high fibre content. Chia seeds are an ideal ingredient for baked goods, breakfast cereals, toppings for sweet and savoury dishes, and for creative dessert combinations.
